/NF10/ Usability:

 • The user interface should be intuitive and user-friendly to ensure ease of use for both novice and experienced users.

/NF20/ Performance:

 • The application should respond to user actions promptly, and database queries should be optimized for efficient data retrieval.

/NF30/ Security:

 • User authentication and registration processes must be secure, and passwords should be encrypted.

 • Access to certain functionalities, such as creating players, teams, and events, should be restricted to authenticated users (Admins).

/NF40/ Reliability:

 • The system should be reliable, with minimal downtime and the ability to recover from any unexpected errors.

/NF50/ Scalability:

 • The application should be designed to handle a growing number of users, teams, and events without a significant degradation in performance.

/NF60/ Documentation:

 • Provide comprehensive documentation, including user guidelines ("How to") to assist users in understanding and using the application effectively.

/NF70/ Compatibility:

 • Ensure compatibility with various web browsers and devices to accommodate a diverse user base.

/NF80/ Data Integrity:

 • Implement measures to ensure the integrity of player, team, and event data, preventing inconsistencies or inaccuracies in the application.

/NF90/ Interoperability:

 • The application should be designed to integrate with external systems or APIs for additional features or data exchange if necessary.
